## LIVESTOCK CO-OP. HAS ANOTHER SUCCESSFUL YEAR

### NET SURPLUS FOR YEAR LARGEST IN ALL A.L.C. HISTORY

Volume Down Somewhat From Banner Total but Gross Revenue Much Higher

#### BAN REMOVAL PROSPECTS

Edmonton Manager Urges Return to Optional Basis of Grading for Hogs

(Special to The Western Farm Leader)

EDMONTON, June 28th.—Net surplus on the operations of the Alberta Livestock Co-operative, for the financial year which ended on May 31st last, was the largest in the history of the Co-operative, it was announced in the Directors' report read here today by President Hugh Allen. Figures on the operations of the year were examined in detail and proved most gratifying to the delegates present.

While the high totals of 1943-44 and 1944-45 were not attained in volume the increase in dollar value of all livestock placed the gross handlings only slightly below those of the banner year of 1943-44. In that year the value was \$23,600,000 and from it gross revenue of \$111,500 was obtained. During the year just closed the gross value of handlings was about one million dollars less but the gross revenue was \$135,300.

#### Should Prepare for Change

Prospective lifting of the embargo on livestock for the United States was referred to by Mr. Allen and also by S. W. Sheppard, Edmonton Manager, and George Winkelaar, Calgary Manager. It was desirable, said Mr. Sheppard, that we should prepare ourselves for such an event in order to take advantage of the opportunities it would afford. "There will be no problem in regard to cattle shipments," he declared, "but under the present system of grading hogs a different picture exists. Hogs to go across the line will have to be sold on a flat basis. We must however maintain quality and grading of one kind or another. Therefore I suggest that this Convention petition the Government to reinstate the optional basis of grade for hogs. Carcass grading of hogs seriously hampers our bargaining power. If the optional basis were available there is no question that greater deliveries of hogs would be made to the public market."

#### Cattle Volume Up

At Edmonton yards, cattle sales and purchases by ALC showed a marked increase over the previous year. Calf and sheep marketings were slightly less, while hog marketing sales improved to the extent of 50,000 head.

Calgary yards ALC handlings were approximately 50 per cent more for cattle, 42 per cent more for calves, only 73 more head of sheep (a fraction of 1 per cent), and about 30 per cent more hogs.

## Co-ops' Role Big in Rebuilding Europe

Stampede Has Colorfulness of Old West

Indians in colorful regalia take a most important role in events at the Calgary Stampede, to be held July 5th to 10th. Many live during the week in the Indian village at the Stampede grounds, and take part daily in down-town parades. At the grounds visitors will see the Indian relay races. Photo by Barrs

### H. P. Wright Again Heads Canadian Seed Growers

Howard P. Wright, of Calgary, was re-elected President of the Canadian Seed Growers' Association at the recent annual meeting in Vancouver. Alberta Directors are P. J. Rock, Drumheller, and A. M. Wilson, Edmonton. Reports presented showed that the past year was a successful one. We plan to deal at a later date with these, and with the decisions of the meeting.

Provisional returns, recently announced, show that the value of British exports during May was, with

### Opening of New C.B.C. Stations Will Be Delayed

For technical reasons it has been found necessary to postpone the dates of the opening of the new prairie region stations of the C.B.C.—CBW at Winnipeg and CBX at Edmonton. Announcement of the postponement was made by the C.B.C. last week. The official openings are now scheduled for Sept. 5th (CBW) and Sept. 8th (CBX).

the exception of one month in 1920, the highest in Britain's trading history.

### CAMPBELL PAINTS 'PICTURE OF CO-OPS' BROAD ACTIVITIES

Assistant Secretary U.S. Co-operative League Addresses Co-operative Conference in Edmonton

#### INTERNATIONAL TRADE

French Co-operatives Work Hard at Reconstruction—Co-operative Housing in Denmark

EDMONTON, Alta.—Co-operatives in the U.S. and Canada are reaching out to assist the Co-operatives in Europe in the huge job of reconstruction and are actively engaged in international co-operative trade, Wallace J. Campbell, assistant secretary of the Co-operative League of the U.S.A., told the University Short Course and Co-operative Conference at the University of Alberta in Edmonton.

#### International Petroleum Association

Mr. Campbell pointed out that Co-operatives in both countries are members of the International Co-operative Petroleum Association, which is supplying petroleum products to co-operatives in all parts of the world.

Co-operatives in Canada are supplying wheat, cattle, linseed oil and other products to Great Britain and are receiving jute and motor cars in exchange.

Hundreds of thousands of co-op members in the U.S. and Canada have sent food and textile packages to co-operators in Europe through the Co-operative for American Remittances to Europe (CARE). Mr. Campbell reported, CARE, he pointed out, is a genuine co-operative-headed by the president of the Co-operative League of the U.S.A.

#### Leap Forward in France

Reporting on his trip abroad, Mr. Campbell said that 2,000 of the 10,000 of the co-operative stores in France were destroyed during the war. Today the French co-ops are working hard at the job of reconstruction. Membership of French farmers in co-operatives jumped from 48 percent before the war to 90 percent today, he said.

In Copenhagen, Mr. Campbell said, 62 percent of all the new homes are being built by the housing co-operatives. Swedish co-operatives have gone actively into the petroleum business and have started many new productive enterprises. These are typical of post-war co-operative developments, he said.

Many of the troubles which face European co-operatives grow not only out of the destruction of the war, but out of trade and currency barriers which chop Europe apart and prevent strong, effective international trade.

In spite of these barriers, the co-operatives in Europe are coming back rapidly and are creating a pattern for democratic economic reconstruction which is the hope of Europe and the world, said Mr. Campbell.

## SOUTHERN ALBERTA DAIRY POOL SECTION

## High Compliment Is Paid by Fitzpatrick

### Impressed by Way Reports Presented to Annual Meeting

Speaking at a small informal dinner which followed the conclusion of the sessions of the Annual Meeting of the Southern Alberta Dairy Pool, F. J. Fitzpatrick, Supervisor of Co-operative Activities for the Alberta Department of Trade and Industry, paid an exceptionally high compliment to all who had participated in the day's business proceedings. He commended the spirit in which all discussions had been carried on, and especially the very detailed and lucid form of the reports presented.

"Your reports were better than most which are given at meetings of co-operatives in Alberta," he said. "I refer in particular to those presented to the delegates by your President and General Manager and to the financial statements."

#### Common Purpose of All Shown

This tribute, from an organizer and executive, part of whose business it is to travel from meeting to meeting, keeping in touch with every phase

of co-operative development in the Province, and whose judgment is therefore of especial value, was endorsed by others who had been present as observers of the day's proceedings. In those proceedings the utmost liberty and frankness in discussion under the genial chairmanship of President William Burns, was combined with a clearly revealed harmony and devotion on the part of all to one common purpose—the welfare and development of the co-operative in the interest of its members.

Pointing out that the financial benefits to be derived from co-operation make a very strong appeal and prove powerful factors in building up co-operatives, Mr. Fitzpatrick said this was to be expected, and that financial results were of course of high importance.

#### "Main Shortcoming of Co-operative Movement"

Nevertheless, he added, "the main shortcoming of the co-operative movement is that so many who take part in it look at it primarily from a money standpoint."

A co-operative, he believed, should be "a service organization", giving its members service, not in a financial way alone, but providing amenities for them and their families. Nurseries for children, for example, and other facilities for those patronizing a co-operative, might well be provided in many cases, and perhaps in some cases libraries.

"Forget about the dollars, and think of starting to carry out the co-operative philosophy," the speaker said. "If you make service your philosophy you will not need to fear any other philosophy, and you'll not need policemen to keep down those who have another philosophy."

#### How Farmers' Interests Have Broadened

R. O. German, Secretary of the Alberta Wheat Pool, who said it had been a great pleasure to him to witness the progress made by the S.A.D.P., called attention to the way in which, since the early days of the co-operative movement in Alberta, the field of action has broadened. He himself had been struck forcibly by the nature of this change when he compared the agenda of an average Wheat Pool Board meeting of today with the agendas of earlier years. In the beginning, the Directors had to deal almost entirely with local and provincial matters, and the agenda were accordingly brief. Today, it was often necessary for the Directors, in order to deal with the business of their members to the best advantage, to think in terms of international affairs and global action.

## Officers Elected

Elections for two-year terms took place in District 2, where T. H. Bond of Priddis was unanimously re-elected, as was William Burns of Three Hills in District 4. Continuing Directors from last year are J. H. Rhodes, Brant, District 1, A. G. Butler of Bottrell, District 3, J. E. Blore of Craigmyle, District 5.

Mr. Burns was re-elected President by the Board; Mr. Bond was elected First Vice-President and Mr. Blore Second Vice-President; and Mr. Rhodes Secretary.

A good many members of co-operatives, said James R. McFall, Secretary of the A.F.A., possibly did not stop to realize what the leaders they had elected were doing for them. He could not help wondering where agriculture in Western Canada would stand today if a pattern of action had not been set in the national economic field, for instance, suitable to the solution of problems facing the primary industry.

#### Acting Deputy Speaks

K. A. Pugh, acting Deputy Minister of Trade and Industry, said he was honored to bring a welcome from his department. There were now 329 co-operatives incorporated in the Province, an increase of 29 during the past year.

Pointing out that the "large benefits of co-operation are given in the stabilization of prices," Mr. Pugh said that these benefits were not easily computable in dollars and cents—yet their value was unquestionable. Responsibility lay on the co-operatives and labor to develop mutually satisfactory relationships. Legislation could not do the job for them. It could merely provide the means by which the job could be done.

Warm congratulations on success achieved by the Southern Pool were expressed by President James A. Wood of the Central Alberta Dairy Pool, and the General Manager of the C.A.D.P., Ellis A. Johnstone, also expressed pleasure in the good year the sister Pool had enjoyed, and spoke of fruitful conferences between the Pools in which he had taken part. Chris Toppenberg, General Manager of the Southern Pool reciprocated the felicitations.

Leonard D. Nesbitt, Director of Publicity for the Alberta Wheat Pool, spoke briefly and wittily.

## SOUTHERN ALBERTA DAIRY POOL SECTION

## Maintenance of High Quality Butter Commended

Warm commendation of the management and staff of the Southern Alberta Dairy Pool, for the maintenance of high quality in butter production in face of the difficulties of the past winter, was unanimously expressed by the Delegates to the annual meeting of the Pool on motion of F. J. Muller of Hussar. President Burns pointed out that "the S.A.D.P. has made its name on the quality of its butter."

**Every Member Owns Part of Pool**  
During the course of the meeting a very thorough discussion took place upon the means by which there may be brought home to members of the Pool a fuller realization of the fact that each one of them is the owner of a part of the business—that they are really shareholders who have a most positive and continuing interest in it.

A committee of three, Messrs. Blore, Sherring and Muller, was appointed to inquire into means by which this end may be achieved, and the inquiry will include such matters as the best method of electing delegates.

Initiated by Len Sherring of Granger, the discussion served to reveal the strong sense of a common purpose—the firm loyalty and devotion to the interest of every member—of all who were present. Incidentally, Secretary J. H. Rhodes and Miss A. H. Edgar, who were responsible for the compiling of most interestingly detailed minutes of the last annual meeting, were complimented on the fine job which had been done.

**Board Action Approved**

The meeting approved unanimously the action of the Board in "setting aside that portion of the final payment as set out in the audited statement, to be used to reduce our indebtedness to the Government, and the amount to be credited to the individual members in proportion to the volume of butterfat shipped." A further resolution, by Messrs. Muller and Van Wyck, was also unanimously

adopted, favoring the reduction of the remaining indebtedness of the company, and proposing means by which each member might assist to this end by lending to the Company. Full discretion was given to the Board to work out details of some such plan.

**Ceiling Price and Feed Costs**

The following resolution was adopted by acclamation: "Whereas the Federal Government has set a ceiling on butter prices, and whereas it is anticipated that the Government may lift the embargo on feed grains to the U.S.A. thereby increasing the cost of producing a pound of butterfat; therefore, be it resolved, that the Government keep the ceiling price of butter in line with feed costs and any other factor entering into the cost of production."

Among those who attended the meeting in addition to the delegates was Mr. Bergen, representing the Rosemary Co-operative Ltd.

**Veterinary Questions and Answers**

*Veterinary questions sent in by paid-up subscribers will be answered by our graduate veterinarian in this section, without charge.*

**Shipping Fever**

**C.E.H., Alhambra.**—I am about to load out some stock to be shipped about 400 miles. I would like to know what kind of hemorrhagic serum to use and when to vaccinate—before loading or after they reach the destination.

**Ans.**—We feel that you will get the highest protection against the hemorrhagic septicemia or shipping fever as it is also called, by vaccinating these animals with the anti-hemorrhagic septicemia vaccine. These are not serums. The treatment should be applied at least 10 days, and better two weeks, before the animals are loaded to start the journey.

The reason is that when they are vaccinated they have temporarily a period of reaction, or what we sometimes call the negative phase, in which the animals are going through what equals a mild form of the disease. To ship them at once would catch them in the most susceptible stage. On the other hand, they will build up within two weeks a higher than average resistance to the complex of germs that we call "shipping fever", and at that time are far more likely to resist exposure to them.

If the animals are vaccinated immediately after they reach destination, many of them may be so tired and exhausted that the dose of vaccine may only push them further down and leave them for a few days more susceptible than they would otherwise be.

Watch them closely after arrival at destination and feed moderately for a few days, but see that they have plenty of water in which you have put some ordinary baking soda. Use enough to make the water taste of it noticeably. If one seems off feed or has a fever, call a veterinarian at once and start a sulphur drug treatment, for, taken in hand promptly by someone who understands how to use them properly, these drugs have given excellent results in stopping losses from shipping fever. In well advanced cases, no treatment is very hopeful. Make sure that these animals have good protection from storms and especially cold rains after they reach destination, for rest is what they need more than anything else.

CALGARY, FRIDAY, JULY 2nd., 1948

No. 13

### FARMERS' INTERNATIONAL INTERESTS

Reading through an official press summary of various problems of world agricultural policy, dealt with at the recent Paris Conference of the International Federation of Agricultural Producers (I.F.A.P.), we have been reminded of a few remarks made by R. O. German, Secretary of the Alberta Wheat Pool, at the annual meeting of the Southern Alberta Dairy Pool.

Mr. German said that there had been a remarkable change, since the early and formative years of the Pool, in the character of much of the business with which meetings of the Board of Directors are called upon to deal. In the early years, the agenda of a Board meeting tended to be brief, and the questions to be settled were to a marked extent local and Provincial and western. The time required to clear the agenda was as a rule not very long.

Today, said Mr. German, the agenda for the average meeting was longer than before. The subjects to be dealt with were much more varied. Local and Provincial issues remained, but the Directors might be called on to discuss matters—all in the interests of the growers—of a global sort. Events in remote parts of the world were seen to have a direct bearing upon the present welfare and future prospects of Alberta farmers.

### SOME OF THESE GLOBAL MATTERS

One of the first paragraphs to catch our eye in reading through the I.F.A.P. reports set forth that an extensive program of work through its Standing Committee on Agricultural Co-operation was outlined by the "Working Party" on this subject at Paris.

This committee is to operate, at the outset, in three groups, comprising the Scandinavian nations, other European states, and the North American countries. The report proceeds:

"The Working Party recommended the collection and dissemination by I.F.A.P. of news concerning agricultural co-operatives, and, in examining the practices of governments in matters connected with trade agreements, declared that the I.F.A.P. should examine trade agreements in order to protect the interests and participation of co-operatives in such trade.

"The question of direct intertrade between agricultural co-operatives in importing and exporting countries was reviewed, and, in particular, the possibility of establishing an international co-operative exchange.

"Close liaison between I.F.A.P. and other international organizations dealing with agricultural co-operation was favored, and it was considered that a detailed study should be made of the possible development of the movement when the present participation of governments in trade is relaxed. The Working Party recommended the appointment to the staff of I.F.A.P. of an officer to handle this program."

### RELATIONS WITH UNITED NATIONS

In view of the fact that the I.F.A.P., with a small staff, would be unable to maintain contact with all branches of United Nations, it was recommended that efforts should be concentrated on collaboration with the headquarters and regional offices of the Food and Agriculture Organization (FAO).

The Federation's European office, to be established in Paris in the near future, will work in close association with the Agricultural Committee of the Organization for European Economic Co-operation (Paris), the ad hoc committee on Agriculture of the United Nations Econ-

### CONFESSION

*Scanning the muddled scene on which the tale  
Of endless plot and counterplot unwinds:  
Weary of dire predictions that assail  
Our ears and stir confusion in our minds;  
Counting of this elusive peace the cost,  
Fearing the weapons we ourselves have made,  
We wonder is the cause of freedom lost,  
The struggle and the sacrifice betrayed?*

*We cannot fan hope's dwindling spark to flame,  
Nor faith renew in world peace to be,  
By measuring and weighing praise and blame,  
Or prattling of the fettered and the free.  
We must at last, grown humble in defeat,  
The aid of Power beyond our own entreat.*

ISA GRINDLAY JACKSON.

omic Commission for Europe (Geneva), and the Interim Commission of the International Trade Organization.

That's rather a formidable and tiresome list of names to read, perhaps, but we print it to show how widespread the field of action of the farmers' international organization is becoming. Let us add this comment, quoted from the report:

"In discussing the relationship between FAO National Committees and farmers' organizations, it was realized that such committees could in no way form a substitute for the free and independent farm organizations, and accordingly it was recommended that farmers should press for the closest collaboration between these bodies and their associations."

In future issues we hope to be able to publish a number of feature articles on the Paris Conference, especially contributed to this paper.

### ALBERTA LIVESTOCK CO-OPERATIVE

Very comprehensive reports presented at the annual meeting of the Alberta Livestock Co-operative, held in Edmonton this week, show that the co-operative has enjoyed another year of success and new achievement.

The net surplus on operations during the financial year which ended on May 31st last was the largest since the formation of the A. L. C.

The reports make it clear that the services given by this co-operative, and its associate bodies in the other Provinces, have brought great benefits to the producers by whom they are owned and controlled. These co-operative agencies have, in fact, become indispensable factors in the economic life of Western Canada—indispensable at least from the standpoint of the producers, whose interests they protect and serve.

### CALGARY STAMPEDE

The Calgary Exhibition and Stampede, like other fairs which are held throughout the summer, provide opportunities for the farm people and others to spend a day or a few days which may be both profitable and pleasant, in a special kind of holiday. They have a distinct contribution to make to the improvement of animal husbandry and farming practice in general.

The Calgary Exhibition and Stampede has a quality of its own; and since the end of the war it has been developing its special quality. The distinctive new features announced this year will undoubtedly give added attractiveness to the event for many Westerners, as well as for those who come from great distances to see the show.

# BLUEPRINT OF DESTINY

By E. S. RUSSENHOLT

*Fulfillment of Canada's destiny as a "power for good among mankind" is the theme of this final chapter of the series by Mr. Russenholt, of the Public Relations Branch of Canadian Co-operative Wheat Producers.*

We are blessed with abundant power sources. . . . IF we will develop and use them. We can team up the eternal power of our mighty rivers with our coal and fields; and grid our entire region with power lines, linking these primary power sources. *If we so will*, we may put to work more power per capita than any other similar region on earth—to produce multiplied "wealth"; and help to guarantee prosperity and security for many times our present population.

## Fish Can Prove of Immense Value

Canada has more fresh surface water than any other country on this earth. Our region has its abundant share. Short-sighted exploitation and careless neglect have destroyed countless streams and lakes. Wise management can restore timber cover and beavers; and restore, improve and create streams, marshes, ponds and lakes. In these waters we can develop vast commercial fisheries; and sport fishing to lure nimrods from all over North America. Lakes created by big projects, and myriads of farm and community ponds, can add to production—and bring a share of all this right to our doors.

\*We must build a network of high-

ways, waterways, airways and communications, to protect our forests and waters; and reap full harvests from our farms, forests, furs, fish, mines, power, wildlife, recreation and all our resources.

## Wildlife Is A Crop

Wildlife is one of those resources I never appreciated, when living on the farm. Aside from shooting moose and deer, ducks and geese, the only wildlife was found in the little town on Saturday nights; and was limited to ice cream and square dances.

Today, we know that wildlife is a crop which responds tremendously to management. Wild animals, birds and fish have a capacity for production that is almost explosive in its intensity, when management helps Nature.

The work we can do to multiply wildlife, is the same work we must do to battle drought—control floods—prevent soil erosion. And wildlife is a dominant factor in building up recreation and tourist industries.

## From the Corners of the Earth

In the Northern part of our region, we have vast ranges of wilderness and waters. People from the corners of the continent want to come to this region—and leave their dollars and good wishes with us—in exchange for the game, health and memories they take back home.

The people of United States spend \$3 billions a year on hunting and fishing. Conservation of our wildlife and

## Vegetable Oil Imports

WASHINGTON, D.C.—U.S. imports of vegetable oils and oilseeds totalled 446 million pounds in the first four months of this year, compared with 535.7 millions in the corresponding months of 1947.

wilderness resources might divert 20% of that total to Canada; and add to our income the value of another bumper wheat crop.

So our Saskatchewan-Nelson region can produce many times more "wealth" than we harvest from it, at present—and can provide security and prosperity for many times our present population—IF we use all our resources of land and water.

Other vast river regions remain untapped—almost unknown. The late R. B. Bennett, returning from Europe before the second World War, stated his belief that the Germans, for instance, would make far better use of Canada's resources—to support far greater population.

## Man Moves to Open Spaces

History teaches that the problems men face through the ages change their form, but never their substance. The force that moves population masses is hunger. Man has moved from where he is overcrowded to the open spaces, looking for food. This, in turn, may warn us that IF we leave the most of our West unpeopled and barren . . . IF we fail to develop its vast, unused resources, then . . . a day may dawn when the vast potential of this region is in the hands of others.

For myself, I believe that day will never dawn. For I believe that . . . as surely as our rivers shall run through our great plains . . . and the grass shall grow on our prairies . . . and the trees shall shadow our forests . . . so surely

shall we fulfill the blueprint of destiny that calls Canada to be a power for good among mankind.

## A Great Work

For God has called together the Canadian people from the ends of the earth—and led us through wars and booms and depressions—to prepare us to do a great work. Our destiny is to be a leader among mankind, not by bossing other nations but by using our vast resources "for the greatest good of the greatest number of people"—to provide food for hungry stomachs, clothes for naked backs, shelter for homeless heads, and so generate in millions of hearts the understanding and goodwill which is the only foundation on which all peoples can come together as brothers in a world of peace.

# Central Alberta Dairy Pool Section

SLOGAN FOR TODAY: "More Milk from Every Cow"

Men who will direct the affairs of the Central Alberta Dairy Pool during the coming year are shown in the group above. At the left President James A. Wood is seen reading his annual address before the Pool Convention at Alix. At the table is the chairman of the day, R. R. Armstrong of Olds, No. 6; J. A. Ross, Duhamel, No. 2 (Secretary of the Board); John Stone, Alix, No. 1; front row, Adam Robertson, Bowden, No. 8, Vice-Pres.; Ellis A. Johnstone, General Manager; James A. Wood, Elnora, Domoney, Red Deer, No. 4; A. W. Green, Byemoor, No. 3, President; Jack Hutchings, Consort, No. 7

## MANAGER SEES GOOD PROSPECTS FOR YEAR 1948

Pointing out that "in the operation of a business that does something around five million dollars a year much could be said, for undoubtedly there are a great number of problems which are constantly arising, and, of course, require decisions," Ellis A. Johnstone, General Manager of the Central Alberta Dairy Pool, showed that operating problems had been reduced to a minimum "through the very fine co-operation of the membership and interest on the part of the personnel at our various businesses. Under all ordinary circumstances," he added, "your organization should enjoy another reasonably good year during 1948.

"Values for all dairy products months' time from now, will not be good," Mr. Johnstone continued. "There is every reason to believe they will be maintained at present levels or very close thereto; therefore, if sufficient quantities of each are produced, the year 1948, on review in about twelve

months' time from now, will not likely be considered an unsatisfactory year."

Mr. Johnstone declared that "the production of sufficient milk for Canadian requirements is a very important item to all Canadians. For Canada

is divided into two groups; first you are a consumer or else you are a producer. If the producer section is not able to supply sufficient dairy products for the over all Canadian requirement, then, as happens in every other industry, a substitute will be found, which will, in our opinion, react unfavorably to the future prosperity of our industry."

### Trend to Delivery By Producer

Recalling the fact that a year ago he had discussed the trend from truck delivered cream to delivery by the producer, Mr. Johnstone quoted figures which showed that the trend is continuing. The percentage of local cream delivered to Pool plants, which averaged 56.2 in 1946, rose to 57.8 in 1947.

Dealing with trucking costs, which vary from a normal of 2 cents to a high of 9 cents per pound butterfat, the General Manager showed that in 1946 the average at all plants was 3.676, and in 1947 it was 4.245 cents. "Wherever practical," he said, "we are encouraging our members to arrange delivery of their own cream and eggs and poultry. Where this is not practical, of course, we still maintain a trucking service."

Going on to deal with production figures for the Province, which he believed to be "reasonably bright", Mr. Johnstone anticipated that Alberta would produce as much this year as last, with a possibility of an increase of 10 per cent. "This," he

stated, "is likely to be in addition to possibly some increased quantities of milk that will be used for condensing, ice cream, fluid milk, and for the purpose of making cheddar cheese.

"On eggs and poultry, of course, our production on eggs is considerably higher, up to this time, than it was a year ago." Poultry handling, it was anticipated, would be somewhat reduced as compared with delivery figures for 1947.

Physical assets of the Pool, the

### Protect Poults Against Roup Now!

## LINES ON DOMINION DAY

Out of an Empire a Commonwealth was born;  
Not in defiance is its flag unfurled,  
Rather it beckons to mankind still torn  
By strife that threatens to engulf the world.  
Beckons all nations to the cause of peace—  
Stretches its hand in brotherhood,  
Bidding them learn that hate finds no release  
In war's dread sacrifice of human blood.

Far flung its bounds and yet so close, its ties  
Of love are strong as iron bands.  
It seeks no praise; nor fears the darkening skies,  
A branching oak, and like the oak it stands  
Unhurt by storms; a shelter from the blast  
For all who seek to live in amity.  
There justice grows from seed sown in the past  
By one small island in a silver sea.  
Let no man think that this vast commonweal,  
Because of those who would besmirch its fame,  
Hath not the power of ancient royal steel,  
To keep undimmed the glory of its name.

And on Dominion Day we now declare  
That Canada is part of this strong band  
Of nations pledged to peace and freedom fair  
For all their people and for ev'ry land.  
This is the day on which we make it known  
The faith in Canada our fathers had,  
Is still our faith, though it has stronger grown—  
Is still the faith that makes our people glad.

O Canada, on guard we stand for thee,  
Within this Commonwealth where all are free.

—SYDNEY MAY.

### CENTRAL ALBERTA DAIRY POOL SECTION

C.A.D.P. DELEGATES are seen in session above at their Annual Convention at Alix. The Convention was one of the shortest on record. Detailed reports of the year's business gave great satisfaction.

Board," said Mr. Johnstone, "to keep our plants in good repair." For that purpose some \$38,600 had been expended on equipment and buildings in 1947, the same figure as for 1946. Nothing was to be gained by letting plants run down, but a great deal by keeping them up-to-date and in good repair and appearance.

"It has been the policy of the

#### At Rocky Mountain House

Mr. Johnstone said that under ordinary circumstances it could be anticipated that the Pool's investment in the Rocky Mountain House plant, acquired in 1947, would be returned to the organization within five years. For years a truck service had been maintained to members in that area, but owing to extremely high cost of operation, this had had to be discontinued from 1945 onwards.

"We would assume," said the speaker, "that the addition of this plant to our organization was very acceptable to our members in that part of the area that our organization services. Thus Rocky Mountain House plant has very good possibilities for future development and growth."

Mr. Johnstone pointed out that the Pool now operates 12 creameries in Central Alberta, out of a total of 28 plants.

## POST-WAR CHRONICLE

June 17th—Strikes in 25 French towns involve almost 100,000 workers, states Paris despatch; about 180 injured in disorders in Clermont-Ferrand. Good harvests should mean "beginning of end" of austerity in Britain, opinion of London observers.

June 18th—Fifty UN guards to fly to Palestine tomorrow at request of Bernadotte. British, U.S. state currency reform for Western Germany to take effect Sunday.

June 19th—Yugoslavia offers to settle claims of U.S. against government. Russia reduces reparations claims against Finland, Romania, Hungary, stated in Washington. Ten-power conference, to arrange free navigation of Danube, slated for July 30th.

June 20th—Greek regulars launch biggest offensive of civil war against guerillas. U.S. wheat exports will shortly be placed in hands of private firms, is Washington report.

June 21st—Russian Commander Sokolovsky says currency reform instituted in Western Germany is illegal and cannot be recognized in Berlin. More than 1,000 Chinese drowned in floods in Foochow. Israeli communists announces armed clash between Hagana regulars and Irgun (extremist organization). Ottawa ratifies 5-year international wheat agreement.

June 22nd—Russia agrees to four-power talk on uniform currency reform for Berlin, says German news agency; Russian military authorities announce currency reform for eastern Germany and Berlin. At Lake Success Russia vetoes U.S. proposal for atomic control, but Russian delegates abstain from voting on Canadian resolution to have matter debated by UN security council. Canadian Parliamentary committee on Indian Affairs recommends new Indian Act to be based "on proposition Indian is human being". Canadian Medical Association decides to co-operate with any national health insurance instituted by Federal Government.

June 23rd—Foreign ministers of countries in Russian sphere of influence meet near Warsaw. Russians stop rail traffic into western parts of Berlin. Troops unload perishable cargo on London docks, in tenth day of dock-workers' strike.

June 24th—Dewey chosen presidential candidate by U.S. Republicans. General Clay says nothing "short of war" will drive U.S. out of Berlin; Sokolovsky says

four-power K commandatura government in Berlin has practically ceased to exist; Britain bans shipments of coal and steel from British to Russian zone. Irgun says will no longer operate as armed force against Hagana.

DEWEY

June 25th—Russians stop food shipments from their zone into Western-occupied sectors of Berlin; Bevin states sufficient food on hand for immediate needs. Truman signs bill to conscript men 19 to 25 for 21 months' military training. Britain asks for postponement of Marshall aid agreement to permit further consideration of terms.

June 26th—Israeli gets UN green light to push through food convoy, stopped by Egyptians on Friday.

June 27th—U.S. will send 39 passenger and cargo planes to Germany to help fly supplies into Western zones of Berlin. Czech Social Democrat party unites with Communist party.

June 28th—English dock strike spreads to Liverpool and Birkenhead; Attlee says "Communist mischief" partly responsible; state of national emergency declared. Communist Cominform charges Yugoslav Communists and Tito follow "hateful policy" to-

## OUR ADVERTISERS

## C.A.D.P. SECTION

(Continued from page 7)

Quality of receipts of cream at Pool branches and of first grade butter produced compares favorably with Provincial averages, the report showed.

**"Better Than Any Previous Year"**

Summarizing, Mr. Johnstone pointed out that the auditors' figures showed an operating result for 1947 "somewhat better than in any previous year." Production was up slightly, but the increase in financial surplus came in the main from the rise in inventory values of products handled for members.

"If it had been the policy of the organization to store more butter," said Mr. Johnstone, "then our operating surplus would have been increased by the amount of the inventory rise in the value of that product. Recognizing, generally speaking, 'what goes up, must come down', our policy on inventory values is what we would consider a conservative one, which should enable us to be at least partly prepared for the time when inventory values instead of holding at present levels will be declining. We have shown nothing in our surplus account that might react later on to the detriment of our operations in any period where there is declining values on a product.

## Meetings on Pool Affairs

Difficulties experienced in getting people out to meetings were described, and a resolution was adopted recommending that every Director call a meeting of his delegates at least once a year, to discuss Pool affairs, which all members would be urged to attend to inquire into matters concerning the business they own. C. S. Johnson of Fleet said he had made several unsuccessful attempts to get people out to meetings.

Norman K. Kirkham, Field Representative, when called upon, announced that he had held 34 meetings from the late fall until snow storms made it impossible to hold them.

C. A. Thorp, Manager of the Royal Bank at Ait, spoke briefly congratulating the Pool on its record.

## Improved Honey Industry

The introduction of central packing and grading of honey by the Ontario Honey Producers' Co-operative, a generation ago, has improved the entire Canadian honey industry, declared F. R. Armstrong, honey marketing expert of the Dominion Department of Agriculture recently. The occasion of his address was the 25th anniversary of the co-op.

wards Russia.

June 29th—Trygve Lie may bring Berlin crisis before UN Security Council, reported. English dock workers vote to end strike.

## COLORFUL NEW FEATURES AT STAMPEDE

**N**EW records of attendance representing all parts of Western Canada, as well as the Eastern Provinces and the United States, are confidently anticipated at the Calgary Stampede next week by J. Charles Yule, General Manager.

Talking over the plans for Stampede Week with *The Western Farm Leader* some days ago, Mr. Yule stressed the attractiveness of completely new features this year, which, added to the general program which always makes a visit to the Calgary Stampede memorable, enables him to give definite assurance to prospective visitors that the show will positively prove to be the "Biggest and Best" in Calgary Stampede history.

### Never An Afternoon Show Like It

"We have never had an afternoon show like the show we have arranged for this year," stated Mr. Yule. "One thing we have done about it will be especially appreciated. For the first time in our Stampede history, Brahma bulls—there are forty of them, imported from Texas—are here for the bull riding event."

Owing to the wildness of these hump backed animals, special plans must be made for the protection of the riders—and by the way, only riders who are absolute tops will tackle these beasts at all. It is necessary to have a clown in the arena, who at the conclusion of each ride, in a mock bull-fighting act, distracts the attention of the bull from the rider. For this job the services of Slim Pickins of Fresno, California, have been obtained. Dressed in cape and bull-fighting costume, he will give added color and thrills to the events. Between these encounters he will amuse the crowds with his antics and those of his trick mule.

Another highlight of the afternoon performance will be an outstanding act in rodeo by Dick Griffith of Scotsdale, Arizona. At the conclusion of a spectacular trick riding performance, Griffith will make a Roman standing jump (one foot on each of two horses) over an automobile. He has been adjudged several times the champion trick rider of the world, and he has performed at Madison Square Gardens in New York for 10 consecutive years.

The Board of the Exhibition and Stampede bought 20 top bucking horses that took part in last year's events, and these were kept at Dick Cosgrave's ranch for winter training, and will be as good as last year. In fact the bucking stock all round will be up to the high standard of 1947. There'll also be more top notch U.S. ropers than ever before. Roping this year will be optional tied or dally.

Altogether, the prize money to be paid out to the winners of all Stampede events is expected by George Edworthy to exceed \$30,000.

### Outstanding Evening Events

There will be new records in evening events. With eight new outfits entered for the chuck wagon races, there will be the greatest number of contestants in the history of these events. For the first time there will be a wagon from Saskatchewan—entered by Joe Stupka of Meadow Lake—and of course there will be the veterans of many of these events in Calgary.

It was generally agreed that the fireworks show of the Thearle-Duffield Company of Chicago which was given in 1947 was the best the Stampede has had. They are in charge again. Monday, Wednesday and Saturday evenings there will be novel and magnificent displays. As last year, there will be many moving representations outlined in fireworks; and this time the

biggest of all displays will be one of the Royal Wedding at Westminster Abbey. Their Royal Highnesses Princess Elizabeth and Prince Philip will be depicted coming down the steps from the abbey, and entering and riding in their carriage.

A fast-moving show in which comedy will predominate will be provided on the platform by the Ernie Young Booking Agency of Chicago. The show will be the most costly in Stampede history.

A number of factors have combined to reduce the number of entries in the livestock events. The heavy increase in freight rates is one of them. Well-known breeders from Eastern Canada now find the cost of bringing their stock for exhibition in Western Canada too high; though the Prairies will be well represented and there will be several herds from British Columbia. A factor affecting E.C., however, is of course, the recent floods, and the late spring has been another factor affecting prairie entries.

### Most Generous Prize List

While numbers will be down, those exhibitors who do take part will have the most generous prize list ever offered in Western Canada to split amongst them, the total being no less than \$23,500, for cattle, horses, sheep and swine classes. Entries total about 1100.

The big downtown parade on Monday morning, July 5th will be more essentially a Western affair and an historic affair than ever, while there will be a record number of participating bands, including, for the first time, the Vancouver Kitsilano Boys' Band and two others from Cranbrook, B.C., as well as the Edmonton School Boys' Band. Others will be from Calgary city and various parts of Central and Southern Alberta.

A big drawing card for band entries, of course, is the T. Eaton Company Trophy of \$500, offered this year for the first time, for out of town bands.

There has been a good response to the appeal made for community floats. As was the case a year ago, commercial floats are "out", but there will be more old time vehicles to add to the Western spectacle.

### Indian Races

Tuesday, Thursday and Friday evenings at the Stampede Grounds, the Stony, Blackfeet and Sarcee Indians will race—but this time the races will be relays—an innovation that is sure to arouse much interest.

Morning street events in downtown Calgary will be more Westernized even than in the past—with stage coaches and other old vehicles meeting every train. There will be six chuck wagons on the streets each morning, providing free flap jacks; while the old-time fiddle and mouth organ contests proceed.

## Interests of The United Farm Women

### Many Changes at Ottawa in Thirteen Years

Dear Farm Women:

It is thirteen years since I wrote my last letter from here. And thirteen

Ottawa, Ont.

years makes for many changes. It has made for changes in me of course. Perhaps that is why I noted when at the church which I formerly attended I was introduced to the new minister, he said, "We are always glad to have the old people back again"!!

It has made for changes in others as well; there are more grey hairs in some instances and fewer hairs in others; there are children new to this world, there are those who have passed on, and an additional maturity for others. Fortunately for me it has made no difference in the hearts of my friends, although Ottawa is often spoken of as the city of "The King is dead: long live the King". This last knowledge, I think, makes for greatest happiness when one returns anywhere to a home of former years. When it is in a city as beautiful as Ottawa it is indeed a pleasure.

#### At the Experimental Farm

Over and over again I have been thinking, and at times repeating audibly, that I wish every single one of you could have the opportunity to visit this your capital city of Ottawa. There are many things to interest many people, but I wish you could drive out to the Experimental Farm which is an absolute picture, but where much practical work has been done that has been of service to the farm people of Canada. I wish you could see it at this, the iris season: great orchid-like blossoms in such a range of coloring as we now get. When I exclaimed about them someone said, "Oh you should have been here at daffodil time," and another interjected, "or before that at tulip time," and I remembered I had heard one woman say, "Oh, it is the time of roses when it is at its best".

It is thus a varying picture which changes with the season, but at present the iris seemed most numerous, although all the late spring flowers were on the canvas. The lilacs and they now range from the white through pink to the deepest lilac made for fragrance in the air. But if I were to continue and name them all, my letter would be full. The lawns must have a word. Still retaining the fresh coloring of spring, they stretched a beautiful carpet. And the years have introduced 2,4-D and the knowledge that if it is sprayed on these green carpets, they will no longer be marred by unwanted dandelions and plantain.

#### A Joy to be Remembered

The flowers, the lawn, the trees — and few who have pictures of Ontario elms in their memory can forget their grace and majesty, the beautiful homes, the water—make the drive a joy to be remembered.

But the thirteen years have made for other changes. Unfortunately all that time has not been a period when men's thoughts were turned to the beauty of a city and to constructive efforts in the best interests of any city the world over. Ottawa has been one of the cities with its life very much centred around the efforts of destruction man has made. It has had to think in terms of the war, and building after building has been erected hastily with the thought of utility so predominant that beauty has been sacrificed.

In addition to this beauty of the Agricultural farm, of the drives through streets which seem like aisles of a great cathedral with the arching elms overhead, and along the canal and the river, Ottawa has much to offer. The art gallery for instance, and the library of the House of Commons. So my visit has been one of the pleasures of my life. But above these beauties and the points of interest, what has given me greatest happiness is the

## Farm Home and Garden

**Fruit Cream Dressing:** Mix together 1 tbs. cornstarch, ½ cup pineapple juice, rind and juice of half a lemon, and cook over boiling water until thick; then add half a beaten egg and ¼ cup corn syrup. Cool. When thoroughly cold, fold in ½ cup cream whipped stiff. Serve with fruit salad.

**Sour Cream Cake:** Cream half cup shortening with 1 cup sugar, add 2 eggs, one at a time, beating well after each addition; stir one-third cup milk into ½ cup thick sour cream; sift together 2 cups flour, 3 tsp. baking powder, ½ tsp. salt; combine the three mixtures gradually, and add 1 tsp. vanilla. Bake in moderate oven.

**Fruit Punch for Fifty:** Steep 1 ounce tea (in cotton bag) in 1 gallon boiling water for five minutes; stir well and remove bag. Add juice of 4 lemons, and 3 cups sugar or honey. Cool. Add ice to chill. Add 2 quart bottles of ginger ale just before serving.

**To Set Colors in garments** before washing, soak for two hours in solution of one level teaspoon powdered alum to 1 gallon of water.

**Air-Cushion Substitute:** To ease the position of an invalid unable to move, blow up a hot-water bottle full of air, screw top on quickly, and place under aching hip or back.

Okotoks U.F.W.A. held no June meeting on account of muddy roads, but several members attended the conference at High River.

Mrs. Barker, Director, gave a very fine address to a recent meeting of Balzac U.F.W.A., held at the home of Mrs. Keith Rosenberger.

Letters of thanks for ten overseas parcels despatched in March were a pleasant feature of a recent meeting of Conrich U.F.W.A.

kindnesses of old friends and new, the little thoughtfulnesses of a hostess busy with her little family and the loyalty of others. These are things we all can offer. I have learned some lessons.

Yours sincerely,  
H. ZELLA SPENCER.

## The Western Farm Leader PATTERN DEPARTMENT

4760  
SIZES  
1 to 4 yrs.

Each item in this five-piece outfit is in one main pattern part. Applique-trimmed frock, ruffled petticoat and panties, sunsuit and bonnet, are included.

Pattern 4760 comes in sizes 1, 2, 3 and 4 years; in size 2, the dress requires 1½ yards of 35-inch material and the playsuit 1½ yards.

Price of pattern, 25 cents. Please be sure to give size required, and your name and address.

### Patterns from Past Issues

In ordering patterns from issues more than a month old, please be prepared to have substitution made as in these cases we cannot be sure of supplying the pattern desired.

Many useful hints for travellers were passed on during roll call at the June meeting of Bismark U.F.W.A. (Ponoka). To raise funds for the Ponoka rest room it was decided to sponsor a series of teas, each member to begin by inviting five friends.

## "New Canadian" Program at Camrose Conference

Addresses on "Cancer" by Dr. Young of the Smith Clinic, on "Teen-Agers" by Miss Mamie Simpson, dean of women of the University of Alberta, and on "Girls' Clubs" by Miss Armstrong, home economist, were important features of the very successful U.F.W.A. Conference held in the U.F.A. Hall, Camrose, recently. Visiting senior officers of the organization who spoke during the day included Mrs. Lowe, U.F.W.A. President; Mrs. Douglas, Director for Macleod; Paul A. Farnalls, Director for Camrose, and Ben Hirsch, Junior Director.

During the afternoon, Rev. Father Carswell delighted the gathering with two piano solos. Other entertainment introduced "Our New Canadians" and included a Swiss duet and display of articles from Switzerland; a Swedish song and dance by a mother and daughter in Swedish costume; a Ukrainian song and recipes by a lady in Ukrainian costume; displays of articles from Scotland, Germany and Denmark; and a talk on Norway by a gentleman recently returned from that country.

### Income Tax Exemption Asked

Dissatisfaction with existing Income Tax regulations was expressed in a resolution which asked for a \$750 exemption for a farmer's wife and a further exemption of \$400 for each dependent. Other resolutions asked the Federal Government to assume financial responsibility for cancer research, and asked for provision to be made for persons incapacitated by accident or incurable disease.

Mrs. Lehman was chairman for the day and Mrs. Jas. Hallum acted as secretary. Camrose U.F.W.A. served lunch at the close of the conference.

Plans for helping with meals at the local sports day and for catering for the Calf Club banquet formed the chief part of the business at the June meeting of Westlock U.F.W.A.

## A.L.C. CONVENTION (Continued from Page 1)

EDMONTON, June 28th — At the annual banquet of the organization held in the Corona Hotel this evening, at which Charles P. Hayes, the Vice-President, proved a most capable and witty master of ceremonies, Roy Marler, President of the Alberta Federation of Agriculture, gave a brief account, much enjoyed by the company, of his recent tour through the farming areas of France. This tour preceded the meeting of the I.F.A.P. in Paris.

Carl Stimpfle, President of the Alberta Farmers' Union, referring to the anticipated lifting of the embargo on the export of cattle to the United States, expressed fear lest the resulting increases in prices might cause farmers to unload too much of their stock. This was to be feared particularly in the case of the average-sized farm, rather than on the part of the big cattle people. There was danger that breeding stock might be depleted. Moreover, the opening up of the U.S. market would upset all price schedules in Canada; and to prevent this the Dominion Government should take steps to stabilize the economic set-up.

Mr. Stimpfle proposed as the only way to deal with the situation, the setting up of a government board on similar lines to the Wheat Board and to keep the home market supplied and to place the surplus in a pool for export, proceeds of the pool to be divided among the livestock producers.

Although Britain's merchant navy lost more than 11,000,000 tons of shipping during the war, it is now only one million tons short of pre-war strength.

## World Wheat Situation

By LEONARD D. NESBITT,  
Superintendent of Publicity,  
Alberta Wheat Pool

While the outlook for the 1948 world wheat crop remains generally favorable, it is not assured that all food requirements of wheat can be met and all controls over consumption discontinued. The weather would have to remain unusually favorable until after harvest to make this possible.

A good European crop is anticipated. Harvesting has commenced in some of the southern European countries and with good weather should be general soon. Acreage in Roumania is estimated at 6,715,000 and if no drought or rust is experienced the yield is expected to be about 14.1 bushels per acre, compared to a nine-bushel average last year. This would provide a wheat crop of 94.7 million bushels as compared to only 52.3 million last year. Reports on the Russian grain crop are conflicting and unreliable, but it would appear that conditions have been generally favorable and that Russia will probably have significant quantities for export.

### In Western Europe

France has been reported to have a probable 1948 crop of 292 million bushels as compared to last year's crop of only about 150 million. This compares well with the 1935-39 average of 286.5 million. Italy is expected to harvest about 230 million bushels, which is over last year's production, but still somewhat less than the 1935-39 average production of 279 million. Near normal yields are expected in Germany and Spain.

Should these favorable prospects materialize it may be possible in the not too distant future to restore bread grain rations to normal levels and divert less coarse grains to food consumption and thus improve the outlook for livestock rehabilitation.

The outlook in the United States remains generally good, and a combined winter and spring wheat crop of over 1,100 million bushels is anticipated. The winter wheat yield is expected to average 16.1 bushels per acre, down 3.4 bushels from last year and one-half bushel lower than average.

Seeding in Argentina and Australia is nearing completion, and the immediate prospects appear to be good.

### Outlook in West Only Fair

In Western Canada the crop outlook is only fair. Prospects are good in Manitoba, but very patchy in Saskatchewan, where large areas are endangered by drought and where considerable damage is being done in central and southern regions by an outbreak of grasshoppers. In Alberta there is a deficiency of moisture all along the eastern border and in the north-central region. On the whole the western crop is late. Good weather with timely rains in July is needed to produce a good crop on the Canadian prairies.

## Fine Livestock To Be Shown at Edmonton

Some of the country's finest livestock will be on show at Edmonton's 70th annual summer fair, to be held July 12th to 17th. Prize money in the livestock and grain sections has been materially increased. There will be six days of horse racing, the greatest display of photography ever shown in Edmonton, magnificent fireworks, grandstand attractions each evening, and the Royal American Shows on the Midway. Friday will be Children's Day, with special prizes at the grandstand show designed especially for the youngsters; there will be no admission charge to this show.

Four Canadian Holstein bulls were shipped to Italy recently—the first export of Canadian Holsteins ever made to that country.

## The Dairy Market

All dairy prices remain at the callings. Locally, prints are 67 cents and butterfat 69 cents, with deductions of two cents per pound for truck cream and one cent per pound for train cream (maximum for transportation, 30 cents).

## Livestock Markets Review

EDMONTON STOCKYARDS June 28th—Light receipts and slow trading marked the past week. Prices were around \$2 lower at the close of the week, with choice steers at \$19.50 to \$22; bulk of heifers at \$18 down to \$9; good light cows \$12 to \$12.50; bulls \$9 to \$12.50. Grade A hogs were \$29 for shipment, \$28 at plants.

CALGARY STOCKYARDS, June 29th—Trading has been none too brisk, prices \$2.50 to \$4 below the high time of two weeks ago; the bulk of offerings have been plain to medium butcher cattle and cows. Cows closed yesterday with a weak undertone. It is difficult to give accurate quotations. Hogs sold yesterday \$29.25; Grade A; sows, \$15.10, liveweight. Good lambs sold at \$20. Good butcher steers \$18 to \$19, down to \$14 for common; good cows, \$12 down to \$9.50, canners and cutters \$5 to \$9; good bulls \$12 to \$13, down to \$10.50; good to choice veal calves \$16 to \$19, down to \$12 for common.

## Valuable Discussions at Acadia Co-op Meetings

Sound motion pictures featuring the two new Co-op films, "There Were Three Men" and "Market Wise" were shown to large and appreciative audiences at a series of meetings under the auspices of the Educational Department of U.F.A. Co-op which were held recently in the Acadia Constituency. Meetings were held at Sedalia, Hecmaruka, Garden Plains and Byemore.

Main speakers at the meetings included D. H. Smith, manager of the Maple Leaf coal mine, Jake Frey, president of Acadia Constituency Co-op, A. Edwards, director of Acadia Co-op, and Lawrence Proudfoot of U.F.A. Co-op, who was also in charge of the meetings.

Keen interest in the rapid progress being made by the Co-operative movement, and particularly that of U.F.A. Co-op, was evidenced by the sincere discussions at each meeting.

Encouragement of the planting of windbreaks as an aid to the dairy industry has been undertaken by the Land O'Lakes dairy and poultry co-operative, of Minneapolis. A service has been set up for supplying of selected varieties of trees and shrubs.

## U.F.A. Co-op. and Maple Leaf Petroleum Stampede Summary

A summary of the day's Stampede results will be presented daily Monday through Friday—July 5th to 9th, over CJCL, 9:45 to 10 p.m. Sponsored by U.F.A. Central Co-operative and Maple Leaf Petroleum Ltd., this broadcast should provide a real service to all who are interested in the Stampede results.

## A.F.A. NOTES

By JAMES R. McFALL, Secretary

**Edmonton Co-op Conference**—As these notes are being written a very interesting co-operative program is in progress at the University of Alberta. Representatives of Co-operative Associations from many parts of the Province are in attendance. However, we regret that we cannot report still larger representation from all co-ops.

In the past this program, sponsored by the Extension Department of the University of Alberta and the Committee for Co-operative Education, was held during the winter months. This year it was decided to hold the conference during the summer with hopes that more farmers and their wives could plan to attend. Undoubtedly the rush of farm work because of a late spring has its bearing on this year's attendance. This is unfortunate as I can assure you that you are missing an interesting and instructive series of lectures.

An advance outline of the program was made in this paper recently and no doubt some features may be outlined elsewhere.

If this program is repeated next summer, more farm people should try to attend.

**Bill 135—Marketing of Coarse Grains through the Wheat Board**—Two very important meetings have been held within the last week for the purpose of clarification of Bill 135 passed by the Dominion Government and to ascertain the necessity, and the nature of the desired Provincial complementary legislation thereto. On June 18th an interview was held, when the Hon. C. D. Howe met with delegates from the prairie farm organizations, Mr. Hannam, President of the C.F.A., the Premier and Attorney-General of the Province of Alberta.

Mr. Howe made it clear that whether legally necessary or not, the Dominion would require complementary legislation from each of the three Prairie Provincial Governments before Bill 135 would be proclaimed. The Minister required positive evidence that the people of the Provinces supported the Bill.

This complementary legislation must be passed before August 1, 1948, if the 1948 crop is to be marketed through the Wheat Board, as it must start operating at the beginning of the crop year only.

Any one of the Provinces may, by repealing the complementary legislation, effect the repeal of Bill 135.

Mr. Howe stated that in his opinion the C.F.A. would be asked to submit a price formula for determining price of coarse grains in Canada and accept responsibility therefor. Of course, this price would need the concurrence of the Government. Mr. Hannam pointed out that the C.F.A. had only requested to be consulted and understood that its position would be of an advisory nature only.

## Stampede Visitors Invited to See Red Cross House

Visitors to Red Cross House, 707 13th Avenue West, Calgary, will be cordially welcomed during Stampede Week, from 10 to 12 a.m., and from 2 to 4 p.m. The Blood Donor Clinic will be open for inspection, and members will be present for consultation on setting up local clinics. The Mobile Unit will be on view on the Stampede Grounds or at Red Cross House.

There are 48,756 tractors on Alberta farms, according to the Dominion Bureau of Statistics.

Mr. Howe stated that the Dominion Government would proclaim the Bill immediately following passing of complementary legislation by the three Prairie Provinces, and a price formula had been submitted by the C.F.A. He also said that in the event of farmers in other provinces attempting to export and re-purchase at the expense of the Prairie Provinces, there was a clause in the bill which it may be necessary to proclaim to give the Board power to control exports.

The Annual Meeting of the Manitoba Federation held on June 21st, 22nd, and 23rd, passed a resolution unanimously requesting the marketing of coarse grains through the Wheat Board but opposing Bill 135 as it now stands. By another resolution they requested their Premier to convene a meeting of the farm organizations and the governments of the three Prairie Provinces with the Dominion Cabinet and request that coarse grains be marketed through the Wheat Board this year on a basis that the Board would be a Board operating in the interests of the Producers.

**Farm Radio Forum Conference**—The writer has recently returned from the Annual Meeting of the National Farm Radio Forum held in Regina, June 14th, 15th, and 16th.

The main purpose of this meeting is to bring the Provincial Secretaries together to present reports and discuss their past season's activities. In this way it is possible to ascertain the views of farmers from each section of Canada and to formulate programs which will be of the most help to all.

One of the outstanding factors in this year's conference was the increasing realization voiced by those present that the problems of Agriculture are fundamentally the same. The thinking of the B.C. fruit farmer, the prairie rancher or the Prince Edward Island potato grower has developed until each speaks a common language. The day of the farmer with an outlook no wider than his homestead is past. Farmers are now concerned with the progress of trade, industry and agriculture the world over. This is where Farm Radio Forum can render invaluable service. It can speak to the farmer and for the farmer to bring increasing enlightenment and enjoyment to all those participating in listening groups.

**The President Reports**—Roy C. Marler, President of the A.F.A., was Alberta's representative at the Annual Meeting of the International Federation of Agricultural Producers held in Paris, France. He has just returned and has given us a very full report on this Conference.

Mr. Marler was impressed with the atmosphere of friendship and sincerity which pervaded the meetings despite the fact that many controversial issues were discussed. There will be more about Mr. Marler's impressions of the conference later.

The I.F.A.P. has chosen temporary sites for two offices, one in Paris, France, and the other in Washington, U.S.A. These offices will have their fingers on the pulse of Agriculture in every country and will be able to do a great deal in the way of preparation for the next meeting which is scheduled for Canada.

There were 20 countries represented as bona fide members and 13 countries

Make this year an

## ALBERTA POOL ELEVATOR YEAR

25th Anniversary of the  
Alberta Wheat Pool  
1923 — 1948

with an observer status. A standing invitation was issued to all nations to become members once they can qualify under the rules of the organization. The main factor which is hindering many countries from participating on a membership basis is the fact that they haven't recognized National Farm organizations that can speak for the farmers of their countries. Farm organization in Canada is well advanced and because of this could send a strong, highly respected delegation to take part in this meeting.

## MUSTARD AND CRESS

By SYDNEY MAY

Hello, Folks!

This is Calgary's "Bigger and Better than Ever" month. You know, the time when the moon shines brightly on the Stampede.

We understand that a large consignment of Edmontonians will attend this year's event to try to discover how Calgary does it, but Brother Yule tells us it's still a top rodeo secret.

Report has, it that there will be an extra choice lot of livestock on exhibi-

tion. We suggest the editor of this great family journal interview some of the better looking cows to find out if they are "contented" with present beef prices.

There's no doubt, says Jack Shirley, that the fireworks display will be much more attractive than those staged at Calgary City Council meetings.

Nevertheless, we do not believe the contention of the Exhibition Board that the Calgary Stampede gives the answer to that old, old question of "Why Johnny's SO LONG AT the Fair".

There's plenty of bull about Cowtown's big show, but never a bum steer.

"\$1,000 Damage, Fireman Cut". — headline in the Calgary Herald. The department had better supply the men with safety razors.

### ISN'T IT THE TRUTH

In these days of high prices it does seem that a dollar doesn't have any cents of value.

And that reminds me, chirps Barney Milstein, that it's no good saving dollars these days, as they're more than likely to be worth only 40 cents when the time comes to spend 'em.

We see by the papers that some Calgary residents called out the police because a man in their district was disturbing the neighborhood by continually playing the bag pipes. This, as Brother Smith says, is certainly inciting to riot.

Yep, Norman! But who was doing the inciting—the complaining residents or the guy playing the bagpipes?

In a two-column headline the Calgary Herald says: "Bank of Toronto General Manager Left Harrison Hot Springs, Agassiz shortly before inundations". This sounds very much like news about nothing.

Reminds us of the quip of that famous comedian, the late Dan Leno, who remarked that if he knew he was going to die in South America he'd never go near the darn place.

### GARDEN FAIRIES

It happened in my garden  
Just the other day,  
When all the little fairies  
Had come to dance and play;  
One little dark-eyed beauty,  
All nestled in a rose,  
With a dewdrop for a mirror  
Was powdering her nose!  
While in a golden buttercup,  
The loveliest surprise — !  
A dainty princess fairy bathed  
Before my prying eyes;  
To cover her confusion,  
Two fairy-birds of blue  
Flew with a pansy curtain  
To hide her from my view.  
A garden is the loveliest place  
When fairies come to play,  
And if you wish—and wish—and  
wish—  
They'll really come to stay.  
—Laura E. Ingram, Lethbridge.

And that, Laura, is our idea of what a poem should be.—S.M.

### TO-DAY'S GREAT Ooze

It's better to take the plunge than to shiver on the bank.

"\$25,000 in Liquor Saved By Driver". —headline. Heck, and we can't save enough for a mickey of watered stuff.

"SINGLE man, 36 years, would take honest job or position during Stampede with extremely good pay."—Classified

ad in the Calgary Herald. Ah yes, there probably is an excuse for going to extremes during Stampede week. But heck, what's the difference between a job and a position during that hectic period?

L.M.S., of Edmonton asks us if there will be a provincial election in Alberta this year. We dunno, L.M.S., but you might try asking Premier Manning. He's the guy who could probably tell you.

Knotty Frankie tells us that Li'l Goldilocks, our office vamp, though on the small size, is no half-pint. Nope, says Frankie, who took her out last week, she's too intoxicating.

### OH, ROBERT!

According to U.C.Y. Lore, "Robert P. Slyn was heard singing 'O Sole Mio' at three o'clock in the morning at Plato's the night of Teacher's dance." Ah, well, Bob was probably only hoping that the teachers would learn something from him.

### SEE YOU ON THE MIDWAY —

## CREAM SEPARATOR

## EXCHANGE BOWLS

Does your separator bowl need repair? If  
you are using it every day and can't be with-  
out it, the quickest, simplest and most profit-  
able thing for you is to exchange your bowl  
for one of our guaranteed Exchange Bowls.  
Send us the name, model and serial number  
of your bowl and ask us to ship rebuilt bowl  
to fit. Use your own bowl until our rebuilt  
bowl arrives, then send your bowl with remi-  
tance as listed for your model below. Com-  
plete instructions for returning your old bowl  
will be mailed to you when rebuilt bowl is  
shipped.

Special prices on bowls to fit the following  
models:

**MCCORMICK-DEERING:**  
No. 1.....\$18.10 No. 2.....\$19.10

Each bowl is heavily tinned and so thoroughly  
and completely rebuilt and fitted with brand  
new discs as to be equal to a new bowl in  
appearance, efficiency and quality.

Each bowl is Double Tested for perfect  
results before shipping. We guarantee all  
our rebuilt bowls for performance and close  
skimming.

Save time, money and bother. ORDER NOW.  
If money in full is enclosed with your order,  
we pay express charges on your old bowl.

For other replacement parts for above models,  
inquire for our latest prices. They will save  
you money.
